EXPERIENCE

Staff Developer Advocate, Block

SEPT 2023 - Present | Amsterdam, Netherlands

- Led AI enablement efforts across Cash App, Square, and Tidal, helping engineering and non-engineering teams adopt agentic workflows in real product and operational contexts.
- Designed and delivered workshops and training programs for engineers, product managers, and content designers, translating emerging AI concepts into practical team workflows.
- Partnered with internal tool teams to build tools and provide developer experience feedback, improve usability, and increase adoption of AI tooling across Block.
- Supported the launch and education strategy for codename goose, one of the earliest AI agents and MCP clients, helping position Block in the emerging agentic AI ecosystem.
- Represented Block externally through meetups, conferences, and technical content that connected open source, developer education, and AI product storytelling.

Senior Developer Advocate, CodeSandbox

OCT 2021 - MAY 2023 | Amsterdam, Netherlands

- Designed and executed strategies to improve CodeSandbox presence and relationships with developers in the web community.
- Supported developers of all proficiency levels in JavaScript, Vue, React, Astro, Docker, across frontend libraries & open source projects.
- Created user-friendly templates and sample projects for various languages and frameworks, expediting developers' Time To First "Hello, World!" experience.

Frontend Engineer & Developer Advocate, Flutterwave

JUL 2019 - OCT 2021 | Lagos, Nigeria

- Restructured the knowledgebase and developer programs that resulted in better support and improved developer experience across documentation and libraries.
- Building new products that improve the user experience and discoverability of services across Flutterwave platforms
